

Tadao

The robust *Tadao*® stair nosing is manufactured from one homogeneous piece of premium T6 tempered aluminium. This hard wearing and corrosion resistant nosing is fully code compliant and has colour options by anodising to a high 20 microns. This provides options for colour contrasting with the stair tread whilst allowing the minimalist profile to intrinsically merge into its surrounds.

The unobtrusive nature and competitive cost of *Tadao*® makes it a regular choice for large volume installations in common and high traffic areas.

Tadao® Aluminium Corrugated 10x50
