

Venturi

The *Venturi*® stair nosing allows for installation onto all substrates, including specialised profiles for carpet tile, carpet with underlay and rebated treads. This profile offers a variety of coloured inserts manufactured from high-tech polymer, silicon carbide, and anodised aluminium. *Venturi*® provides designers with options for seamless integration of the stair nosing with surrounding finishes, whilst allowing any unsightly screw fixings to be concealed.

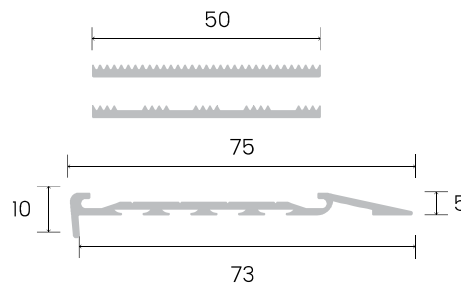

Aluminium

The latest addition to *Venturi*® is the aluminium insert. This aluminium profile can be interchanged in a multitude of combinations giving the creative license back to the designer. Made from quality T6 aluminium, and treated with tough anodising, this slip resistant nosing complies with all regulatory standards. *Venturi*® Aluminium stair nosing is suitable for the most ornate, or the more rudimentary application.
