

Venturi

The *Venturi*® stair nosing allows for installation onto all substrates, including specialised profiles for carpet tile, carpet with underlay and rebated treads. This profile offers a variety of coloured inserts manufactured from high-tech polymer, silicon carbide, and anodised aluminium. *Venturi*® provides designers with options for seamless integration of the stair nosing with surrounding finishes, whilst allowing any unsightly screw fixings to be concealed.

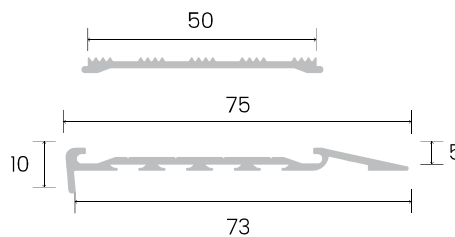

Polymer

The performance *Venturi*® Polymer stair nosing is manufactured in Australia from the highest grade UV stable and shrink resistant polymers. They provide excellent grip, ensuring slip resistance compliance in both dry and wet conditions. The pliable polymer is well suited to areas where barefooted pedestrian traffic is expected, such as aquatic centres or beach access.

Venturi® Polymer Surface Mounted

- Internal Application (Dry Conditions)
- External Application (Wet Conditions)
- Surface Mounted
- Recessed
- Stone / Ceramic / Concrete / Masonry
- Timber
- Vinyl
- Carpet Tile
- Carpet with Underlay
